epro-ER bang

The special hearing protector – for hunters, target shooters, security personnel, police and military forces and more

Hardly anyone knows your auditory canal better

- manufactured individually after ear impression taking, custom-made to fit your ear perfectly
- made of soft material, hardly perceptible
- highest wearing comfort even underneath the protective helmet
- no impairment e.g. when taking aim with long firearms
- the earmold corresponds to that of the world-wide known “ER” musician’s hearing protector

Its heart beats [not only] for “bang – all that is explosively loud”

- noise level-dependent, immediate protective effect during shooting and impulse noises (illustration 1 and 2)
- moderate attenuation effect during unwavering continuous noise (illustration 3 and 4)
- speech and surrounding noise remain audible
- also superbly suitable for percussionists

With or without handle – handle it your way

- “with large handle”: quick and easy insertion in or removal from the ear of your hearing protector
- “without handle”: particularly small shape, cosmetically pleasing, hardly noticeable

It can do “In-Ear-Monitoring”

- with special in-ear earphones it can be turned into professional in-ear-monitoring
- simple, fast removal of attenuation elements / connection of headphones

Unmistakeable – with color mark or colorful selection

- red in right ear
- blue in left ear
- engraved surface (optional), e.g. name
- on request available in different colors

Not in the ear – yet still well protected

- including practical case with belt clip; sufficient space for your epro-ER bang, user instructions, guarantee card, cerumen pin, a cedis care gel

With connecting cord – a useful addition

- optionally available with removable connecting cord (special clips) and clip for attaching to clothes
- the connecting cord detaches itself from the hearing protector under excessively strong pressure – because it’s best to be safe
- includes user instructions and storage case

Hygienically in top shape

- upon request available with antimicrobial surface coating; prevents unwanted deposits from building on the surface

Authentic only with certificate

- your epro-ER bang has been EC type-tested by PZT GmbH and is approved as personal protective equipment (PPE).

egger epro hearing protection devices may only be manufactured and brought into the market exclusively by egger Otoplastik + Labortechnik GmbH and its licensing partners.

EN 352-2:2020 Standard

ANSI Standard

SNR = Single Number Rating in dB
 L = Attenuation values for low frequency noises
 M = Attenuation values for medium frequency noises
 H = Attenuation values for high frequency noise
 ANSI = American National Standards Institute
 NRR = Noise Reduction Rating

Mean attenuation (dB)
 Standard deviation (dB)
 APV₅₀ (dB)

Possible fields of application: Hunters and target shooters, security personnel, police forces, military forces, percussionists, industrial sector and craft sector, e.g. stamping presses
